## Stay on Top of the Structured Finance Market with a Trustworthy Directory

Discover new sales prospects and partners with the Asset Securitization Directory.

### What is the Asset Securitization Directory?

The Asset Securitization Directory (ASD) is the official supplement of the *Asset Securitization Report* and the definitive source of contact information for the structured finance market. The annual print directory contains information on hundreds of firms and thousands of professionals including issuers, investors, administrators/servicers, underwriters, attorneys, CDO asset managers, rating agencies, accountants, trustees, credit enhancers and more.

In addition, ASD is available online at [www.asdirectory.com](http://www.asdirectory.com), providing instant access to the most complete and current database of asset-backed securities firms and professionals. This exclusive resource, updated on a daily basis, connects you to the people and information you need to expand your business throughout the year.

### Why do I need the Asset Securitization Directory?

ASD can help you grow your business by saving you time and money on research and calling campaigns. ASD allows you to quickly and easily access firm rankings and personnel changes including promotions and office openings and closings as well as verify names, titles, street addresses, telephone and fax numbers, e-mail and Web addresses and areas of specialization. With ASD, you can reach a whole new audience and crack into this burgeoning market.

### What the Asset Securitization Directory can do for you

ASD allows you to improve the success of your marketing programs by providing the most current contact data available including a complete listing of market participants such as issuers and investors. We compile and provide in one convenient source the changes that occur at participating firms in the structured finance market so you can focus your resources on what really matters—increasing your bottom line.

Throughout the year, the online version of the Asset Securitization Directory helps you find contacts beyond your network at new, lesser-known issuers. Identifying new partners and prospects has never been easier with powerful search options. Locate an individual's name even when you only know part of a first or last name. You can even e-mail someone right from the site and create your own directory using the Personal Directory feature to save the information you use most often. Customizable search options allow you to view company and individual information according to your unique needs.
